

## "Eliminate Ingrown Hair Within Days!"

**Description:** A post epilating or after shaving solution which eliminates ingrown hair, redness, bumps and irritation caused by shaving, waxing, tweezing and other hair removal methods.

**Who Can Use It:** Both men and women.

**How It Is Used:** For large areas, spray directly onto the affected area.

For smaller and sensitive areas such as eyebrows or bikini area apply with a cotton swab.

Apply liberally and rub in thoroughly immediately after every hair removal session. Then 2 to 3 times daily until the skin clears.

**When Results Can Be Expected:** Ingrown Hair Treatment eliminates ingrown hair within a few days.

**Where It Can Be Used:** On any area of the body where hair has been removed.

**The Pain Factor:** Minor stinging may be experienced due to the alcohol content. The effect is similar to most aftershave products.

To minimize this effect for sensitive skin, allow 10-30 minutes after epilating

or shaving before applying Ingrown Hair Treatment.

**How It Works:** Ingrown Hair Treatment mildly exfoliates the outer dermal layer of skin while adding elasticity to the newly exposed hair.

This releases the trapped hair from under the constantly regenerating layers of skin.

Ingrown Hair Treatment is effective for both the treatment and prevention of ingrown hairs.

**Safety Standards:** Ingrown Hair Treatment does not use Acetylsalicylate (ASA) to deaden pain like some other products.

Even those allergic to Aspirin can safely use Ingrown Hair Treatment.

Ingrown Hair Treatment also provides antiseptic and antibacterial benefits to skin.

**The Guarantee:** Ingrown Hair Treatment is backed by an unconditional, indefinite, money-back guarantee.

If for any reason a user is dissatisfied, just return the remaining solution to Nisim International for a courteous refund.
